PROFESSIONAL SUMMARY

Front-end focused full-stack engineer with 4+ years building stateful React and TypeScript applications, including production Next.js App Router systems using Server Components and Server Actions. I build data-intensive interfaces — searchable member registries, filterable tables, and multi-step validated forms — on TanStack Table, Zustand, and React Hook Form with Zod. I work inside a design system (Tailwind CSS + shadcn/ui), validate every input at the boundary, and currently deliver software into a regulated Philippine financial context (CDA/BIR cooperative compliance). At MRI Software I reviewed teammates' code and mentored developers as the team's go-to front-end resource.

TECHNICAL SKILLS

Core	React 19 · TypeScript (strict) · JavaScript (ES6+) · HTML5 · CSS3 · Embedded Ruby (ERB)
Next.js	App Router · React Server Components · Server Actions · route handlers · SSR/SSG/ISR · middleware · Turbopack
State & data	TanStack Table · Zustand · Redux · REST API consumption · Supabase client · server-state caching · optimistic updates
Forms & validation	React Hook Form · Zod schemas · shared client/server validation · multi-step and dependent-field forms
Design systems	Tailwind CSS v4 · shadcn/ui · Radix primitives · design tokens · component libraries · responsive layout · Motion
Accessibility	Semantic HTML · keyboard navigation · focus management · ARIA labelling · colour-contrast checking · prefers-reduced-motion
Security	Input validation at the boundary · XSS prevention · RBAC · Postgres Row-Level Security · audit logging · JWT sessions
Backend & data	Node.js · Express · Supabase · PostgreSQL · MongoDB · Firebase · Stripe
Workflow	Git / GitHub · pull-request review · code review & mentoring · Jira · Agile / Scrum · Vercel · Cloudflare · AWS S3
AI tooling	Claude / Claude Code · GitHub Copilot · OpenAI Codex · AI-assisted refactoring and code review

PROFESSIONAL EXPERIENCE

Full Stack Developer

Oct 2021 — Present

Freelance / Zenbizo Software and Creative Solutions · Independent client work and Zenbizo products

- Deliver full-stack applications from requirements and interface design through database architecture, deployment, and ongoing support for real estate, retail, coaching, and service businesses.
- Built a multi-branch ERP connecting inventory, cashiering, staff time records, bookings, expenses, and financial reporting with Excel exports.
- Engineered a cooperative management platform covering members, savings, loans, and accounting; one cooperative serves approximately 4,000 members with 20 staff accounts.
- Built Dunn Wisdom's coaching website with a custom CRM, and the Business Growth Workshop website with an integrated CRM and Stripe payments.
- Developed a transaction and settlement platform with request, claim, and completion workflows, reconciling balances, and a full transaction history.
- Build React and Next.js interfaces with TypeScript, searchable and paginated tables, and shared client/server form validation using React Hook Form and Zod.
- Protect client data with PostgreSQL row-level security, role-based permissions, and audit logging; integrate REST APIs, authentication, and payment flows.
- Work directly with clients to scope requirements, deliver tailored solutions, and maintain applications through ongoing subscription retainers.

Software Engineer

May 2025 — Jun 2026

MRI Software · Australia / remote

- Built and maintained responsive front-end interfaces for templated and custom real estate platforms serving clients across Australia and New Zealand, from boutique agencies to enterprise groups.
- Served as the team's go-to front-end resource: reviewed pull requests, mentored developers, and set component and accessibility conventions without a formal leadership title.
- Led technical scoping with consultants to translate client requirements into accurate Statements of Work.
- Consumed and integrated backend APIs to drive dynamic listing data, working with backend teams on contract and payload design.
- Deployed and optimised through Cloudflare — DNS, caching, and security headers — and served assets from AWS S3.
- Built responsive HTML/CSS email templates and generated dynamic property PDFs with TCPDF.

Chief Digital Officer

Aug 2024 — May 2025

WPDC Real Estate

- Directed digital transformation across the business, aligning technology decisions with commercial goals.
- Built client-facing web applications on Next.js, React, and Supabase.
- Managed cross-departmental teams and trained the sales organisation on new digital tooling.
- Implemented data-driven strategies and analytics that improved client engagement.

SELECTED PROJECTS

Dunn Wisdom — coaching website & CRM

dunnwisdom.com • Custom CRM

- Built a coaching website with its own custom-built CRM for managing client relationships.

Business Growth Workshop — website, CRM & payments

MD Marketing & Consulting • CRM • Stripe

- Built the workshop website with an integrated CRM and Stripe payment integration.

Zenbizo Coop — multi-tenant cooperative ERP

Next.js 15 App Router • RSC • TypeScript • shadcn/ui • Tailwind • TanStack Table • React Hook Form + Zod • Supabase / Postgres RLS

- Twelve modules covering members, savings, loans, accounting, and reporting, built for the Philippine CDA/BIR regulatory context.
- Searchable registries and filterable tables over thousands of member records, with server-side pagination.
- Row-Level Security as the hard tenant boundary; RBAC permission catalogue gating every action in the UI and on the server.

Zenbizo System — multi-branch operations platform

Next.js • TypeScript • Supabase • Zustand • Electron

- Runs a multi-branch operator day to day: inventory and ingredient usage, cashiering, daily time records, bookings, and expenses.
- Financial reporting with analytics dashboards and downloadable Excel exports.

Zenbizo Drop — transaction & settlement platform

Next.js 16 • React 19 • Supabase • Chart.js • PWA

- Request → claim → completion payout pipeline with a reconciling ledger and full transaction history.
- Role-scoped dashboards for buyers, sellers, stores, and admins, plus support impersonation.

HIGHLIGHTS

- Named one of the top agents in the MRI Software APAC region.
- Mentored developers and reviewed code at a multinational software company.
- Delivered web projects across Australia, New Zealand, the Philippines, and the USA.

EDUCATION

Full Stack Engineering — Certification

ONECODECAMP

BSU SLS — La Trinidad High School

Valedictorian, 2010
